

FumeCAB 1000 iQ T

ELECTRONICS, PHARMACEUTICAL & MEDICAL

Last Updated on 14.09.2018

The complete cabinet fume extraction solution for a broad range of applications, with a taller, larger working area.

Partial enclosures are becoming the recommended extraction option for a variety of applications. Government bodies, including the HSE in the UK are now making direct reference through guidance documentation such as the new HSG258 to their use.

The FumeCAB 1000 iQ T integrated filtration system has been designed to ensure compliance with the latest regulations. It provides users with an extra depth of working space for taller applications. BOFA's iQ Operating System and ultra-bright slim line energy saving LED lights come as standard, making this system an ideal choice of fume extraction for a wide variety of applications.
